

Duck Tetris

A helpful duck to practice with mistakes.

What is Duck Tetris?

- Duck Tetris is a fully feature-complete Tetris variant
 - Includes SRS, Seven Bag, and accurate scoring
 - Duck food not included
- Occasionally, a duck will appear to sabotage your Tetris game!
 - Simulating mishaps, it helps you learn how to deal with any obstacles in a real game of Tetris!
 - Sabotages include:
 - Spawning garbage pieces
 - Increasing your speed
 - Misplacing
 - Assorted quackiness
 - And more!

Practical Applications

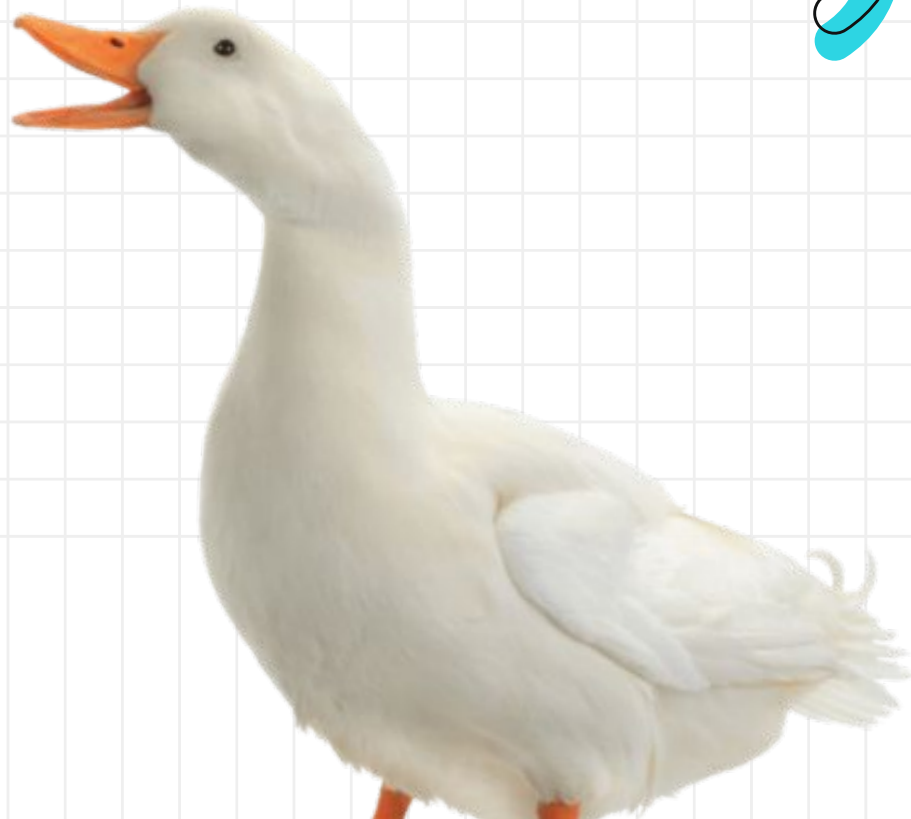

Practice Tool

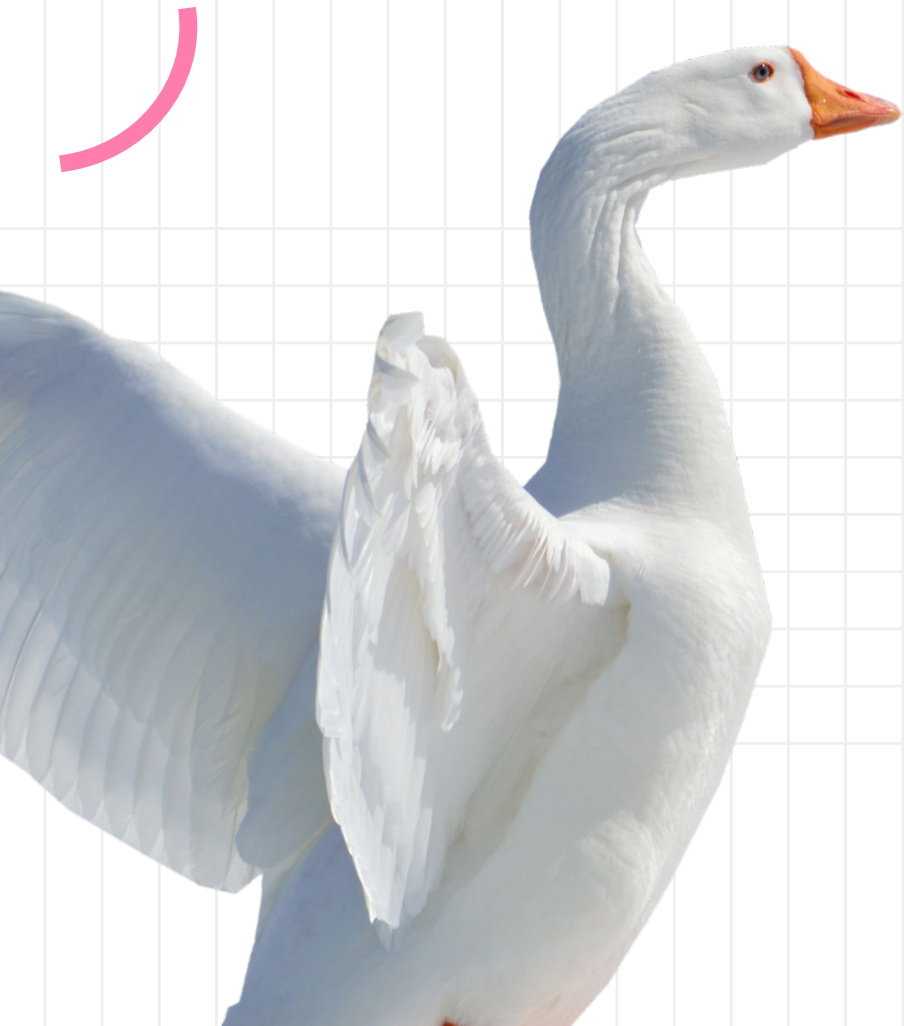

Duck Tetris enables you to prepare for any setbacks you may encounter in a game of Tetris!

Party Game

Gather around and watch your friends succumb to the duck's wrath!

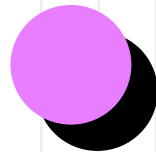

The Making of Duck Tetris

1. Duck Tetris initially started out as a Tetris training tool designed to assist players in developing natural reactions to obstacles in an online game of Tetris.
2. That's when Edward accidentally sent a picture of a duck instead of our updated code.
3. Inspired by the pure and unadulterated fury of ducks, we decided to add a duck to our innocent Python game.
4. This turned out to be our greatest mistake, as the duck's unquenchable wrath prevented us from removing it from the game, as it remains in our source code out of pure vexation.

Favourite Bird: Peacock

The Duck

He broke into our homes last
night and held us at wingpoint.

The End

Goose Tetris coming soon.
